

Mailer

I'm currently in the process of extracting this from another project, I'll update this when it's ready to use

This project aims to provide a common api for popular email providers. It currently supports * Mailgun * Sendgrid

Installation

Add this to your application's `shard.yml` :

```
dependencies:
  mailer:
    github: [your-github-name]/mailer
```

Usage

```
require "mailer"
```

TODO: Write usage instructions here

Development

TODO: Write development instructions here

Contributing

1. Fork it ([https://github.com/\[your-github-name\]/mailer/fork](https://github.com/[your-github-name]/mailer/fork))
2. Create your feature branch (git checkout -b my-new-feature)
3. Commit your changes (git commit -am 'Add some feature')
4. Push to the branch (git push origin my-new-feature)
5. Create a new Pull Request
